

The Honda Jazz e:HEV Range

Honda CONNECT 9" Touchscreen

Fitted as standard on Advance, Advance Sport and Crosstar Advance models, the Honda CONNECT system has an AM/FM/DAB digital radio with Apple CarPlay® / Android Auto™ integration to keep you connected. Garmin Navigation is also standard on Advance Sport and Crosstar Advance models.

The Honda Jazz e:HEV

The new Honda Jazz is designed with a clean, aerodynamically efficient and stylish look, with the reassurance of the latest Honda SENSING suite of advanced safety and driver assistive systems (see right).

Keeping you in touch is the new 7" digital driver display and 9" Honda CONNECT touchscreen, allowing you to view essential information quickly and easily. DAB digital radio is included, while the 9" touchscreen features a clean smartphone-style display with Apple CarPlay® / Android Auto™ integration. You can even connect with your Jazz remotely via the My Honda+ app which, among other features, allows you to remotely lock or unlock the car.

And as you would expect, our ingenious Magic Seats fold flat to the floor for extra load space, or flip-up to enable you to take advantage of the car's full internal height from floor to ceiling.

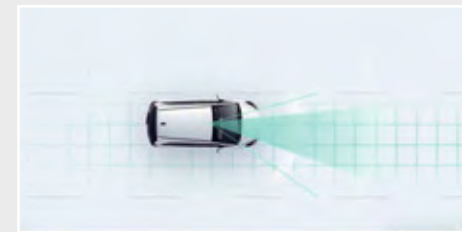

Honda SENSING: technology for safety

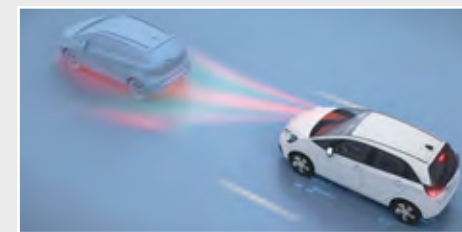

Adaptive Cruise Control
Maintains a set cruising speed and following distance relative to the vehicle in front. If the detected vehicle stops, the function will decelerate and stop your vehicle

Blind Spot Information
This clever device makes lane changes and overtaking safer, warning you when vehicles are detected in your blind spot by illuminating a light in your door mirror

Lane Keeping Assist System
Helps keep you in the middle of your lane, providing a less stressful driving experience by reducing the need for steering correction movements on the motorway

Collision Mitigation Braking
The system will alert you to the possibility of a collision with a vehicle, pedestrian or cyclist – even at night where there is no street lighting – and reduces your speed

Intelligent Speed Limiter
Combines the existing adjustable speed limiter function with Traffic Sign Recognition, to set the speed limit to that which Traffic Sign Recognition detects

Honda e:Technology

Next generation e:HEV Hybrid drive technology in the new Jazz achieves an exceptional blend of effortless driving performance and impressive fuel economy.

It's been designed to provide a responsive, smooth and efficient driving feel in all circumstances.

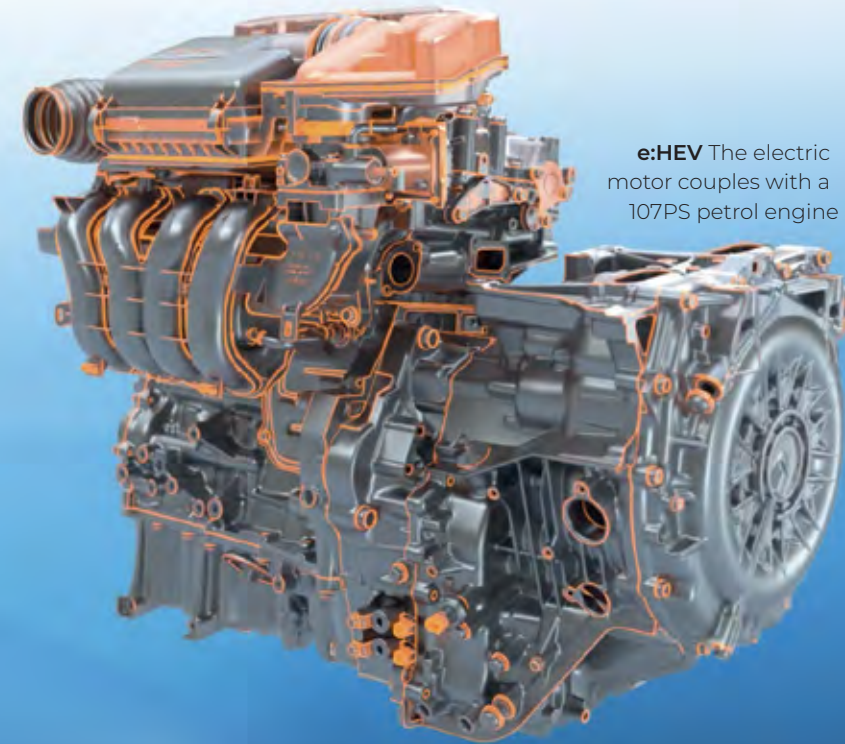

The e:HEV system's specially developed electric motor supplies an impressive 253Nm of torque and is coupled to a lively 107PS petrol engine.

To sustain your driving needs,

e:HEV delivers the car's optimum energy smoothly and seamlessly by automatically switching between three drive modes: engine drive, hybrid drive and a 100% silent pure electric EV drive.

Honda e:Technology is clever, because it constantly monitors the performance and economy of your Jazz to determine the most suitable power source.

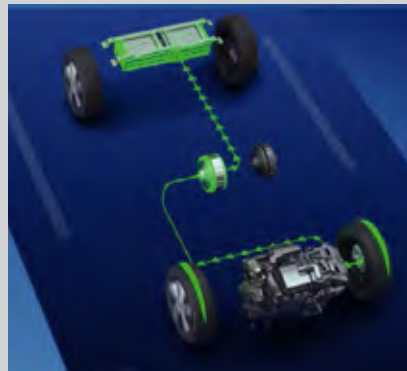

It gives a spirited driving experience, and makes the new Jazz more relevant than ever in today's driving environment.

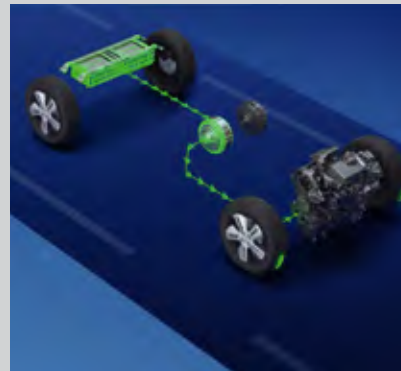

e:HEV The electric motor couples with a 107PS petrol engine

Honda e:Technology: a dynamic, electrified driving experience

Advanced e:HEV Hybrid technology provides a dynamic, electrified driving experience giving the new Jazz range strong performance and fuel economy with low emissions.

Regenerative Braking The e:HEV hybrid drive system returns energy to the drive battery under braking for optimum efficiency

Electric Drive All models in the new Jazz range can drive in 100% silent full electric EV mode, with zero tailpipe emissions while driving

Hybrid Drive The e:HEV system switches automatically between drive modes depending on driving conditions

Engine Drive A 97PS petrol engine drives through the e-CVT automatic transmission, for spirited performance and optimum fuel economy

Jazz e:HEV Elegance

Elegance models come with impressive specification that includes climate control auto A/C, LED head/tail lights with LED daytime running lights, body colour door mirrors with integrated LED indicator, front heated seats, rain-sensing auto wipers, remote heated and retractable door mirrors, Magic Seats and Bluetooth™ hands free telephone integration.

Honda Jazz e:HEV Elegance 5dr

Disclaimer: The information provided in this Guide is for general information purposes only and is correct to the best of our knowledge at the date of publication (June 2023). While we have made every effort to ensure the information in this document is accurate, neither Honda (UK) nor the author can be held responsible for any actions or consequences arising from acting on, or refraining from, taking any action as a result of reading this. The fuel consumption you achieve under real life driving conditions, and CO₂ produced, will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Figures stated are based on a standardised test cycle and may not reflect real world driving, therefore they should be used for comparison purposes only. Customers should only compare vehicles tested to the same technical procedures. There is a new test for fuel consumption and CO₂ figures. You can find out more about the changes brought in by WLTP at <http://wltpfacts.eu/>. The models shown within this document may not be UK specification.
